PLACEMENT DATA ARE REPORTED FOR 5,066 VOCATIONAL GRADUATES FROM 83 SCHOOLS AND COLLEGES IN CONNECTICUT REPRESENTING PROGRAM FIELDS IN VOCATIONAL AGRICULTURE, DISTRIBUTIVE EDUCATION, HEALTH EDUCATION, HOME ECONOMICS FOR GAINFUL EMPLOYMENT, BUSINESS AND OFFICE EDUCATION, TECHNICAL EDUCATION, AND TRADE AND INDUSTRIAL EDUCATION. OF THE 5,066 GRADUATES, 4,139 COMPLETED SECONDARY LEVEL PROGRAMS, 927 WERE GRADUATES OF POST-SECONDARY PROGRAMS IN COMMUNITY COLLEGES, STATE TECHNICAL INSTITUTES, AND VOCATIONAL-TECHNICAL SCHOOLS. NEARLY 82 PERCENT OF THE GRADUATES AVAILABLE FOR PLACEMENT WERE EMPLOYED IN OCCUPATIONS UTILIZING SPECIALIZED SKILLS ACQUIRED IN VOCATIONAL COURSES. THE MEAN HOURLY WAGE FOR THIS GROUP WAS $1.91. APPROXIMATELY 12 PERCENT OF AVAILABLE GRADUATES WERE EMPLOYED IN NONRELATED OCCUPATIONS. ABOUT 20 PERCENT OF THE GRADUATES CONTINUED THEIR EDUCATION ON A FULL-TIME BASIS. ONLY 54 GRADUATES OR 1.06 PERCENT WERE UNEMPLOYED, AN UNEMPLOYMENT RATE WHICH COMPARES VERY FAVORABLY WITH THE ANNUAL AVERAGE FOR CONNECTICUT OF 3.1 PERCENT. FUTURE FOLLOW-UP STUDIES SHOULD DETERMINE THE NUMBER OF GRADUATES PURSUING MORE ADVANCED KNOWLEDGE AND SKILLS DIRECTLY RELATED TO THE VOCATIONAL TRAINING ALREADY ACQUIRED. (WB)

FOREWORD

For many years the Division of Vocational Education has conducted an annual follow-up survey of vocational graduates and published a report showing the results of this survey. Until recently, this report covered only the state-operated technical institutes and vocational-technical schools and dealt primarily with technical and trade and industrial programs.

This year's report shows the placement data for all seven vocational program fields. It covers vocational courses in local high schools and community colleges, as well as the above-mentioned state-operated institutions.

This report is being distributed to vocational educators throughout Connecticut for use as an evaluative instrument in determining the effectiveness of vocational programs in the preparation and placement of students in the occupational areas for which they were trained.

It is our hope that this publication will be of interest and of value to you.

HIGHLIGHTS

Eighty-three schools and colleges reported a total of 5066 vocational graduates of full-time preparatory courses in 1966. These graduates represented seven program fields in vocational education in Connecticut. While most (4139) of these students completed secondary level programs, an appreciable number (927) were graduates of post-secondary programs in community colleges, state technical institutes, and vocational-technical schools.

Nearly eighty-two percent of the graduates, who were available for placement, were employed in occupations in which they were able to utilize the specialized skills acquired in their vocational courses. The mean hourly wage for this group was $1.91. Approximately twelve percent of the available graduates were employed in non-related occupations.

It is of interest to note that almost twenty percent of the graduates continued their education on a full-time basis. It might be worthwhile in future follow-up studies to determine the number in this category who are pursuing more advanced knowledge and skills directly related to the vocational training already acquired.

Also noteworthy is the fact that only 54 graduates of 1.06 percent were unemployed. This is down from the 1.2 percent unemployment rate of the 1965 graduates. It compares very favorably with the annual average unemployment rate for Connecticut of 3.1 percent in 1966.

Unfortunately, 160 or almost five percent of the available graduates were unaccounted for. However, it is anticipated that this number will decrease in future years as local schools refine their follow-up procedures.
